The following is an examiner's statement of reasons for allowance:

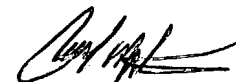

The prior art does not teach the specific parameters and limitations of the claimed product and method of making that product. Also, the mailing of an advisory action on 3/12/04 was a mistake because an RCE was filed. The examiner regrets the error yet this notice of allowability should rectify that error.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawing Correction Needed for Specification:

The specification contains a Brief Description of the Drawings for figures 1-11. However, the specification does not contain a brief description of the drawing for Figures 9A, 9B, and 9C. It only contains a brief description for "Figure 9" yet there is no single Figure 9. Applicants therefore must correct their specification by amending their specification to include a brief description for Figures 9A, 9B, and 9C. Failure to do so will lead to delays in printing of the now allowed claims so it is respectfully requested applicants act immediately to submit a 37 CFR 1.312 amendment to correct this problem.

Inquiries may be made to Paul Marcantoni at 571-272-1373.
